James Patterson is primarily known for his Alex Cross and Women's Murder Club series. The NYPD Red series, which he co-authors with Marshall Karp, is quietly becoming one of the most favoured by readers and the latest book hits bookshelves this month. Karp is an excellent writer and is one of the best series. Only 6 books in so a great series to read over the holiday season.

Edition of this fundamental textbook maintains the book's tradition of clear, thought-provoking instruction. Readers are provided once again with an instructive mix of mathematics, physics, statistics, and information theory. All the essential topics in information theory are covered in detail, including entropy, data compression, channel capacity, rate distortion, network information theory, and hypothesis testing. The authors provide readers with a solid understanding of the underlying theory and applications. Problem sets and a telegraphic summary at the end of each chapter further assist readers. The historical notes that follow each chapter recap the main points. The Second Edition features: \* Chapters reorganized to improve teaching \* 200 new problems \* New material on source coding, portfolio theory, and feedback capacity \* Updated references Now current and enhanced, the Second Edition of Elements of Information Theory remains the ideal textbook for upper-level undergraduate and graduate courses in electrical engineering, statistics, and telecommunications.

An author and subject index to publications in fields of anthropology, archaeology and classical studies, economics, folklore, geography, history, language and literature, music, philosophy, political science, religion and theology, sociology and theatre arts.
