STA Launches Fire Safety Guidance for the Construction Industry Surrounding Timber Frame Properties. The Structural Timber Association (STA) has launched its 'Designers Guide to Structural Timber Frame fire safety during construction' video for the construction industry. Funded by a CITB bid and produced with input from the HSE, the video succeeds the STA's previous fire safety CPD, bringing legislation up to date and presenting the information in an easy to digest format.

STA Launches Fire Safety Guidance Structural Timber ...

The main design options to ensure fire safety are: Prevention: controlling ignition and fuel sources so that fires do not start. Communications: if ignition occurs, ensuring occupants are informed and any active fire systems are triggered. Escape: ensuring that occupants of buildings and surrounding areas are able to move to places of safety .

Dry riser - Designing Buildings Wiki - Share your construction industry knowledge. Dry risers are used to supply water within buildings for fire-fighting purposes. The provision of a built-in water distribution system means that fire fighters do not need to create their own distribution system in order to fight a fire and it avoids the breaching of fire compartments by running hose lines ...

RIBA Statement on Design for Fire Safety. Originally published 22 June 2017.

Starting in the early hours of 14 June 2017 a devastating fire at Grenfell Tower in Kensington, London caused a significant number of fatalities. This document supplements statements made by the RIBA in the immediate aftermath of the tragedy and provides three new contributions:

RIBA Statement on Design for Fire Safety

Fire Safety & Emergency Lighting NICEIC's Fire Alarm courses provide the information needed for the design, installation, commissioning and maintenance of fire alarm systems in domestic and non-domestic installations. These courses also provide the underpinning knowledge requirements to join the BAFE SP203-1 scheme.

Fire Safety & Emergency Lighting - NICEIC

Over the two days the course will provide a good understanding of how to ensure fire detection and fire alarm system design complies with BS 5839-1:2017

Delegates will also be shown how to complete the design certificate. Includes.

Understanding the responsibilities of the designer; Understanding detection zone size
