## [Air Pollution in Delhi | Causes, Effects, Stats, Pollution ...](#)

There are two main ways to deal with the ever-increasing pollution that is contaminating our air, water and soil: mitigation and adaptation. Mitigation involves prevention of the problem before it arises by reducing the amount of carbon emissions in our atmosphere. This can be achieved by switching from harmful fossil fuels to clean, renewable energy such as solar, wind and wave power and other sustainable means, as well as reducing traffic and changing individual daily habits.
