**CREATIVITY AND THE ARTS WITH YOUNG CHILDREN**, Third Edition, is written for early childhood educators as well as those who work with children from birth through age eight. The text focuses on helping educators make the vital connection to the arts—including music, movement, drama, and the visual arts—throughout all areas of the classroom and curriculum, and on developing creative teachers who will be able to foster an artistic environment. Observations and photos of teachers and children demonstrate practical ways the arts can be used to help children reach their potential. Educators will find many ideas for open-ended activities that are important for the development of young children, and which will encourage them to think in new ways. Discussion of professional standards and recommendations allows teachers to be cognizant of goals that are important in the early years. Thorough in its coverage, the text speaks to children with special needs and cultural diversity, leaving readers with a complete information resource regarding arts in the young child's classroom. *Young Children and the Arts: Nurturing Imagination and Creativity* examines the place of the arts in the experiences of young and very young children at home and in out-of-home settings at school and in the community. There is great need for development of resources in the arts specifically designed to introduce babies and toddlers to participatory experiences in the visual arts, dance, music, and storytelling/theater. This book presents valuable guidelines for early childhood teachers, families, caregivers and community organizations. *Young Children and the Arts* presents a comprehensive approach to the arts that is aligned with early childhood developmentally appropriate practice and that combines an exploratory, materials-based approach with an aesthetic-education approach for children from birth to eight years of age. It addresses both how the arts are foundational to learning, and how teachers and parents can nurture young children's developing imagination and creativity. The models presented emphasize a participatory approach, introducing young children to the arts through activities that call for engagement, initiative and creative activity. Additionally, *Young Children and the Arts* addresses the intersection of early childhood education and the arts—at points of convergence, and at moments of tension. The role of families and communities in developing and promoting arts suffused experiences for and with young children are addressed. *Young Children and the Arts* examines the role of innovative arts policy in supporting a broad-based early arts program across the diverse settings in which young children and their families live, work, and learn.

*Creative Arts in the Lives of Young Children* draws together two essential strands in contemporary educational discourse: the importance of high quality care and education in the early years, and the central role that imaginative arts experiences can and should play in the lives of all young children. A number of underlying themes are highlighted throughout the book. All are related to the potential for quality arts experiences in the early years to achieve transformational outcomes for children. These include: the enhancement and development of children's creativity and imagination \* the encouragement of children's innate problem solving abilities \* the opportunity to experience a diversity of cultures and a broad world-view \* the scaffolding of positive attitudes, skills, and ways of being (habits of mind), to help children flourish in the 21st century. The book is grounded in current research and practice about the importance of the arts in young children's lives. Written explicitly for early childhood pre-service and in-service teachers, parents, and caregivers, it includes a range of engaging and practical creative arts activities and suggested experiences for children from birth to eight years of age. *Creative Arts in the Lives of Young Children* provides a combination of research, activities, and real world vignettes. It reinforces partnerships between parents and early childhood practitioners and teachers. The book covers a broad range of artistic experiences, such as storytelling, art appreciation, puppetry, paint, clay, drama, and music.

*An Introduction to Young Children with Special Needs: Birth Through Age Eight* is a comprehensive introduction to educational policies, programs, practices, and services for future practitioners serving young children with delays or disabilities in early intervention-early childhood special education (EI-ECSE). Thoughtfully addressing the needs of children at risk for learning or development delays or disabilities, revered authors Richard M. Gargiulo and Jennifer L. Kilgo offer evidence-based interventions and instructional techniques that provide students with a broad understanding of important theoretical and philosophical foundations, including evidence-based decision making, developmentally appropriate practices, cultural responsiveness, and activity-based intervention. The Fifth Edition includes the latest developments in and influences on the field of early intervention and early childhood special education, including the Division for Early Childhood's (DEC) Recommended Practices, which are infused throughout the text. With the support of this current and innovative book, readers will gain a firm understanding of the complex field of EI-ECSE to assist them in their future study and careers.
