Describe some of the reasons memories are forgotten. you can get amnesia which makes you forget everything and you can try to block out memories. Using examples, compare sensory memory, short-term memory, and long-term memory. short term can only hold up to 7 items for a short amount of time. long term can hold a bunch of items for a long amount of time. sensory gives you time to decide things, prevents you from being overwhelmed, and allows for continuity and stability in your world.
