Cisco UCS B-Series Blade Servers are a popular server choice. A typical UCS configuration includes a Fabric Interconnect (FI) with two separate fabrics, and there are some important considerations for configuring Tintri VMstore storage systems in the UCS environment. This guide describes the Tintri best practices for a UCS environment with VMware.

Cisco UCS Deployment and Best Practice Guide
The following procedure is used for the initial setup of the first Cisco UCS 6100 Fabric Interconnect. Connect to the console port. Power on the Fabric Interconnect. You will see the power on self test messages as the Fabric Interconnect boots. When the unconfigured system boots, it prompts you for the setup method to be used.

Following on from cabling our Cisco UCS infrastructure we will first begin to configure the Fabric Interconnects using the Basic System Configuration Dialog. Connect to the console port of Fabric Interconnect 1 which will be the primary member in the cluster. Power on this Fabric Interconnect leaving the secondary Interconnect powered off for now.

Cisco UCS Fabric Interconnect Basic System Configuration
UCS AAA setup Well, I've been working on this off and on for a few months (yikes) now, and we are still using local authentication for UCS rather than tacacs. I am attaching a few screenshots of how things are set up that I believe encompasses everything, but am more than willing to provide more info if needed.
