Who killed Gwendolyn Paddington? When an extra ticket becomes available to see the dress rehearsal of King Lear, Kellan tags along with Nana D and her buddies. But when one of them dies of an apparent heart attack in the middle of second act, Nana D asks Kellan to investigate. With family members in debt and secret meetings, Kellan learns that the Paddingtons might not be as clean-cut as everyone thinks. Can Kellan find Gwendolyn's killer, or will he get caught up in his own stage fright?

disease, cancer, strokes and other major heart problems.

Shy, reclusive Frankie and her best friend Lou obsess over Thomas G. Longley, as they reverently refer to him, for their entire first two years of medical school. So when he publicly humiliates her at the student bar she is devastated. Ten years later, Frankie has to work in the testosterone driven environment of Cardiology before she can start her palliative care training and, to her dismay, Tom is her boss. Thankfully the subject of her long-term crush doesn't seem to remember her and, given her ability to blend into the background, she's not really surprised. What does surprise her is how cruel he is. Sure he squished her self esteem like a bug at Uni, but the Tom she spent many a pointless lunch break or library session covertly watching seemed easy going and quick to smile; not an uptight, overly critical bully. Between passing out in theatre and being covered head to foot in the bloody vomit of 'Scary Glenda' (A&E's most frequent, frequent flyer), she can't wait to get through the six months. Although she's too timid to tell Tom to jog on when she is his only target, when it's her patients that he starts trampling she decides to grow a backbone, and Tom begins to see that she is not the cold, aloof woman he once thought. Unfortunately his past behaviour is not Tom's only obstacle to gaining Frankie's trust. You see, Frankie knows all about being pushed around. She's dealt with enough verbal and even physical abuse before to last a lifetime, and she's not going to be fooled into thinking that this ruthless alpha male has turned over a new leaf. Luckily for Frankie, Tom is used to getting what he wants. He's determined to make her see herself clearly for the first time in her life and he's just arrogant enough to believe that he can break through her defences. But Frankie has secrets, and a past that is not ready to let

her go quite yet ...This book is a full-length contemporary romance / romantic comedy with its own HEA and no cliffhanger. Author Background Susie Tate is a general practitioner now, but she's also spent years as a hospital doctor. Having worked with and treated some real characters in her time and been involved in some pretty bizarre and often hilarious situations, she wanted to use her experience to write what she hopes is a funny, at times heartbreaking story, with a real insight into what goes on behind the scenes in medicine. Warning - this is an adult contemporary romance and does contain some swearing. Susie would love to say that being foul-mouthed is completely out of character for her but...

Many successful career-driven people lead lifestyles that put them on the fast track for heart disease-the nation's leading cause of death. Too often these individuals will suffer fatal heart attacks without any warning, even though their routine medical exams appeared normal and their doctors had assured them they weren't at risk. *Dead Execs Don't Get Bonus\$* offers eye-opening insights about why this occurs and why it need never happen again. Busy people who don't think they have time for extensive health evaluations also don't have time for a heart attack. Best-selling author and cardiologist Joel Kahn describes how heart-disease prevention can be built into an active lifestyle and shows how early detection is possible. Readers will explore the various medical tests that can protect their lives and careers, learn how to prevent heart disease in the first place, and discover which lifestyle changes are the most effective at reversing cardiovascular disease once its begun.

Valuing People in Construction provides contemporary perspectives on the ' glue ' that

Online Library Con Heart Diseases The Broken Heart Clinical Features Human Genetics And Molecular Pathways

binds the construction process together; people. The book addresses people issues in the construction industry where behavioural outcomes impact upon business and project performance. The main proposition of the book is that as people continue to lead the completion of construction activities, their health, safety, and well-being should be seen as a priority, and valued by stakeholders. As employers and employees, the role of people in construction must be to strive for the improvement of individual lives and society. This edited collection, which is the first book to focus specifically on placing value on people in construction, focuses on people at work, gender at work, conditions at work, and respect at work. In addition to an editorial overview, the book presents tested and refined empirical work and case studies by leading construction researchers from Africa, Australia, and Europe. Essential reading for researchers, students and professionals interested in construction management, the sociology of construction, HRM in construction, gender, work and health studies.

Many students wonder what it is like to die or how to cope when someone they love dies. *Living, Dying, Grieving* helps answer these important questions and provides a mature understanding of what death really is. Taking a “life education” approach, this book offers helpful tips and techniques for mastering a fear of death, suggests helpful ideas for taking care of the business of dying, and encourages students to live longer by adding excitement into their lives. With its unique balance of facts and emotions, both of which surround living, dying, and grieving across cultures and religions, the text gives students the perspective to effectively cope with death and the effects it will have on their lives.
