Hermann Alexander Graf Keyserling (July 20, 1880–April 26, 1946) was a philosopher from the wealthy aristocratic Baltic German Keyserlingk family. In Creative Understanding Keyserling takes the reader on a wild ride through the wilderness of our minds as these relate to the infinite reality that surrounds us.

Providing a comprehensive survey of cutting edge scholarship in the field of German–Indian and South Asian Studies, the book looks at the history of German–Indian relations in the spheres of culture, politics, and intellectual life. Combining transnational, post-colonial, and comparative approaches, it includes the entire twentieth century, from the First World War and Weimar Republic to the Third Reich and Cold War era. The book first examines the ways in which nineteenth-century "Indomania" figured in the creation of both German national identity and modern German scholarship on the Orient, and it illustrates how German encounters with India in the Imperial era alternately destabilized and reinforced the orientalist, capitalist, and nationalist underpinnings of German modernity. Contributors discuss the full range of German responses to India, and South Asian perceptions of Germany against the backdrop of war and socio-political revolution, as well as the Third Reich's ambivalent perceptions of India in the context of racism, religion, and occultism. The book concludes by exploring German–Indian relations in the era of deolonization and the Cold War. Employing a diverse array of interdisciplinary approaches to understanding German–Indian encounters over the past two centuries, this book is of interest to students and scholars of Germany, India, Europe, and Asia, as well as history, political science, anthropology, philosophy, comparative literature, and religious studies.

As a little one, hearing JFK speak for the first time made me want to be just like him. For some reason, his words went straight to my heart, filling my heart with something wonderful. It is a feeling that I later came to understand as a desire to serve—to pursue a life of public service. My desire was for this ideal. These feelings have taken me on a long and tortuous journey. I have been a public servant most of my life. I have gone from a poor little black child, laborer, contractor, and teacher, to politician, lawyer, and judge. But strangely enough, my journey did not end there. My journey did not end with political success. Strangely enough, I discovered that my desire and my ideal meant something deeper and even more wonderful. I discovered that it meant something above and beyond politics—something for everyone. I discovered something good for every single person: the ideal life, a life of true purpose. Not something for the far-distant future, but something that can be achieved in the here and now. And I want to share my experiences of this process (the Tao) with you.

The soul works through the mechanism of a threefold personality. The method by which the soul and the personality vehicles interact and function together is presented in this volume; and also the way the human constitution, as a whole and in its component parts, responds to the impact of an evolving consciousness.

In The Secular Religion of Franklin Merrell-Wolff, Dave Vliegenthart investigates the life and teachings of a twentieth-century American mystic, with implications for the socio-historical background of the ongoing grand narrative that asserts a widespread anti-intellectualism in modern American culture.
