Earth Science Section 1 Atmosphere Characteristics Answers ...

With the exception of Mercury, most planets in the solar system have some type of atmosphere. However, Earth's atmosphere provides what the atmospheres of other planets cannot: oxygen and water. Oxygen, water vapor, and other gases make up the gaseous mixture in the atmosphere called air.

Lesson 1 | Describing Earth's Atmosphere

The Short Answer: Gases and particles in Earth's atmosphere scatter sunlight in all directions. Blue light is scattered more than other colors because it travels as shorter, smaller waves. This is why we see a blue sky most of the time. Same reason the sky is blue."In other words, the color of the ocean and the color of the sky are related but occur independently of each other: in both cases ...
