These three practice test books consist of five complete tests each in the style and format of the Michigan ECCE.

Images of suffering male bodies permeate Western culture, from Francis Bacon's paintings and Robert Mapplethorpe's photographs to the battered heroes of action movies. Drawing on perspectives from a range of disciplines—including religious studies, gender and queer studies, psychoanalysis, art history,

and film theory—*Ecce Homo* explores the complex, ambiguous meanings of the enduring figure of the male-body-in-pain. Acknowledging that representations of men confronting violence and pain can reinforce ideas of manly tenacity, Kent L. Brintnall also argues that they reveal the vulnerability of men's bodies and open them up to eroticization. Locating the roots of our cultural fascination with male pain in the crucifixion, he analyzes the way narratives of Christ's death and resurrection both support and subvert cultural fantasies of masculine power and privilege. Through stimulating readings of works by Georges Bataille, Kaja Silverman, and more, Brintnall delineates the redemptive power of representations of male suffering and violence.

Winner of the Virginia and Warren Stone Prize awarded annually by Harvard University Press for an outstanding book on education and society *What makes a great teacher great? Who are the professors students remember long after graduation?* This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

These three practice test books consist of five complete tests each in the style and format of the Michigan ECCE.

Professor Wells argues that there was no historical Jesus, and in thus arguing he deals with the many recent writers who have interpreted the historical Jesus as some kind of political figure in the struggle against Rome, and calls in evidence the many contemporary theologians who agree with some of his arguments about early Christianity. The question at issue is what all the evidence adds up to. Does it establish that Jesus did or did not exist? Professor Wells concludes that the latter is the more likely hypothesis. This challenge to received thinking by both Christians and non-Christians is supported by much documentary evidence, and Professor Wells carefully examines all the relevant problems and answers all the relevant questions. He deliberately avoids polemic and speculation, and sticks so far as possible to the known facts and to rational inferences from the facts.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these

systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Michigan English Test (MET) is a standardized international examination designed by Michigan Language Assessment and aimed at upper-beginner to advanced levels--A2 to C1 of the Common European Framework of Reference for Languages. The test assesses general English language proficiency in educational, social, and workplace contexts. The MET is intended for adults and adolescents at or above a secondary level of education who want to measure their general English language proficiency in a variety of linguistic contexts. The test results can be used for educational purposes, such as when finishing an English language course, or for employment purposes, like when

Early childhood care and education (ECCE) settings offer an opportunity to provide children with a solid beginning in all areas of their development. The quality and efficacy of these settings depend largely on the individuals within the ECCE workforce. Policy makers need a complete picture of ECCE teachers and caregivers in order to tackle the persistent challenges facing this workforce. The IOM and the National Research Council hosted a workshop to describe the ECCE workforce and outline its parameters. Speakers explored issues in defining and describing the workforce, the marketplace of ECCE, the effects of the workforce on children, the contextual factors that shape the workforce, and opportunities for strengthening ECCE as a profession.
