Macroeconomics is a branch of economics that studies how an overall economy—the market or other systems that operate on a large scale—behaves. Macroeconomics studies economy-wide phenomena such as...

Macroeconomics Definition - Investopedia

It's a fascinating study of psychology, of why people make the decisions they make, and how resources are spread out around the world. Economics is studied in two main strands: Microeconomics is the study of how individual parties (people, groups, and businesses) use their wealth. Macroeconomics looks at entire economies. The unemployment, inflation, and monetary challenges of cities, countries, and continents.
