A carport is a covered structure made from steel or aluminum and built to protect vehicles from the outdoors. Carports are composed of a roof, posts, and beam, and they can be attached to the home or not. Due to the lack of four walls there is less protection for the vehicles but offers ventilation that a garage does not.

Carport plans are shelters typically designed to protect one or two cars from the elements. They are also used to protect other large, bulky or motorized items that might not fit in a garage or basement. Most carports are open-sided on at least one or two sides, if not all four sides. The purpose of a carport plan is similar to that of a garage.

## Carport Plans & Carport Designs – The Garage Plan Shop

The drawings in the examples are only the additional drawings as required to specify the structural requirements not otherwise shown on the builders or owner-builders sketches. Put another way this is the additional documentation submitted after the city council requested further information and engineers calculations.
