An essential guide to a
librarianship based not on
books and artifacts but on
knowledge and learning.
Libraries have existed for

Access Free Expect More Demanding Better Libraries

For Today's Complex World
R David Lanke

millennia, but today the library field is searching for solid footing in an increasingly fragmented (and increasingly digital) information environment. What is librarianship when it is unmoored from

Access Free Expect More Demanding Better Libraries

For Today's Complex World
cataloging, books,
buildings, and committees?

In *The Atlas of New Librarianship*, R. David Lankes offers a guide to this new landscape for practitioners. He describes a new librarianship based

Access Free Expect More Demanding Better Libraries

not on books and artifacts
but on knowledge and
learning; and he suggests a
new mission for librarians:
to improve society through
facilitating knowledge
creation in their
communities. The vision for

Access Free Expect More Demanding Better Libraries

For Today's Complex World
R. David Lankes

a new librarianship must go beyond finding library-related uses for information technology and the Internet; it must provide a durable foundation for the field. Lankes recasts librarianship and library practice using

Access Free Expect More Demanding Better Libraries

the fundamental concept that
knowledge is created through
conversation. New librarians
approach their work as
facilitators of
conversation; they seek to
enrich, capture, store, and
disseminate the

Access Free Expect More Demanding Better Libraries

For Today's Complex World
communities. To help
librarians navigate this new
terrain, Lankes offers a
map, a visual representation
of the field that can guide
explorations of it; more
than 140 Agreements,

Access Free Expect More Demanding Better Libraries

statements about
librarianship that range
from relevant theories to
examples of practice; and
Threads, arrangements of
Agreements to explain key
ideas, covering such topics
as conceptual foundations

and skills and values. World

Agreement Supplements at the
end of the book offer

expanded discussions.

Although it touches on
theory as well as practice,
the Atlas is meant to be a
tool: textbook, conversation

guide, platform for social networking, and call to action. Copublished with the Association of College & Research Libraries.

This book offers a guide for librarians who see their

Access Free Expect More Demanding Better Libraries

For Today's Complex World
R. David Lankes

profession as a chance to
make a positive difference
in their communities --
librarians who recognize
that it is no longer enough
to stand behind a desk
waiting to serve. R. David
Lankes, author of The Atlas

Access Free Expect More Demanding Better Libraries

For New Librarianship, World
reminds librarians of their
mission: to improve society
by facilitating knowledge
creation in their
communities. In this book,
he provides tools,
arguments, resources, and

Access Free Expect More Demanding Better Libraries

ideas for fulfilling this mission. Librarians will be prepared to become radical positive change agents in their communities, and other readers will learn to understand libraries in a new way. The librarians of

Access Free Expect More Demanding Better Libraries

Ferguson, Missouri, famously became positive change agents in August 2014 when they opened library doors when schools were closed because of civil unrest after the shooting of an unarmed teen by police.

Access Free Expect More Demanding Better Libraries

Working with other local organizations, they provided children and their parents a space for learning, lunch, and peace. But other libraries serve other communities -- students, faculty, scholars, law firms

Access Free Expect More Demanding Better Libraries

For in other ways. All World
libraries are about
R David Lankes
community, writes Lankes;
that is just librarianship.
In concise chapters, Lankes
addresses the mission of
libraries and explains what
constitutes a library. He

Access Free Expect More Demanding Better Libraries

offers practical advice for
librarian training; provides
teaching notes for each
chapter; and answers
"Frequently Argued
Questions" about the new
librarianship.

Access Free Expect More Demanding Better Libraries

Let us start with a simple
scenario: a man asks a woman
"how high is Mount Everest?"

The woman replies "29,029
feet." Nothing could be
simpler. Now let us suppose
that rather than standing in
a room, or sitting on a bus,

Access Free Expect More Demanding Better Libraries

For Today's Complex World
R. David Lanke

the man is at his desk and
the woman is 300 miles away
with the conversation taking
place using e-mail. Still
simple? Certainly--it
happens every day. So why
all the bother about digital
(virtual, electronic, chat,

Access Free Expect More Demanding Better Libraries

etc.) reference? If the man is a pilot flying over Mount Everest, the answer matters. If you are a lawyer going to court, the identity of the woman is very important. Also, if you ever want to find the answer again, how

Access Free Expect More Demanding Better Libraries

For Today's Complex World
R David Lanke

that transaction took place matters a lot. Digital reference is a deceptively simple concept on its face: "the incorporation of human expertise into the information system." This lecture seeks to explore the

Access Free Expect More Demanding Better Libraries

question of how human
expertise is incorporated
into a variety of
information systems, from
libraries, to digital
libraries, to information
retrieval engines, to
knowledge bases. What we

Access Free Expect More Demanding Better Libraries

Learn through this endeavor, begun primarily in the library context, is that the models, methods, standards, and experiments in digital reference have wide applicability. We also catch a glimpse of an unfolding

Access Free Expect More Demanding Better Libraries

future in which ubiquitous computing makes the identification, interaction, and capture of expertise increasingly important. It is a future that is much more complex than we had anticipated. It is a future

Access Free Expect More Demanding Better Libraries

in which documents and artifacts are less important than the contexts of their creation and use. Table of Contents: Defining Reference in a Digital Age / Conversations / Digital Reference in Practice /
