Technical Data. Enviroair Heat Pump Sizing Guide. A heat pump that uses air as its heat source will perform better as the air temperature increases. The
industry standard for quoting the output and efficiency of an air to water (ATW) heat pump is 7°C external temperature and a 35°C flow temperature.
However, to meet MCS (Microgeneration Certification Scheme) criteria, the heat pump should be sized according to the lowest geographical temperature
where the heat pump is to be installed.

Manufactured by Firebird, the Enviromax C44 is a condensing system oil boiler designed for internal floor-standing installation. The unit can fit under a standard kitchen worktop so it won't take up much space and comes housed in a durable casing with a high-quality finish to make it an aesthetically pleasing addition to a kitchen or utility room. This is the most powerful boiler in the Firebird Enviromax range, boasting an output of 44 kW, which is ideal for larger homes with 2+ bathrooms.
