When Ford teamed up with Cosworth Engineering to breathe life onto its humdrum Sierra, few knew it would be the birth of a motoring legend. Through circuit racing and supercar-humbling on-road ability, the 1985 Sierra RS Cosworth quickly became a household name. A practical four-seater boasting 204bhp from its two-litre turbocharged powerplant, the RS Cosworth's massive performance was equalled only by an extroverted rear wing designed for high-speed stability.. While motorsport machines scooped innumerable victories and increasingly powerful engines, in 1987 Ford homologated a yet-more-spectacular Sierra - the 224bhp RS500. It instantly became a desirable collector's piece.. Other RS Cosworths soon followed. The restrained four-door Sierra Sapphire RS Cosworth of 1988 was Ford's vision of a 150mph executive express; two years later, its four-wheel-drive successor returned the firm to rallying. By 1992, Ford had squeezed the 4x4's running gear into a shorter Escort body, complete with 227bhp engine and ever-more-aggressive aerodynamic aids. The limited-edition Monte Carlo came in 1994, followed by the final RS Cosworth - a revised Escort with smaller turbocharger and user-friendly appeal. Production ceased in 1996. Today, each model has a loyal following among motorsport fans

## Download Ebook Ford Sierra Cosworth Escort Service Manual

and fast Fords enthusiasts. And as the cars become increasingly sought-after, so too does the pursuit of perfection. This book examines RS Cosworth authenticity, outlining standard specifications alongside in-depth colour photography of outstanding examples of the breed. From body panels and trim to turbochargers and tyres; from interior fabrics and paint schemes to shock absorbers and stickers, Ford's factory-original fitments are covered in comprehensive detail.

The Escort RS Cosworth, which began rallying in 1993, was one of the most ingenious designs of all time, and eventually became Ford's most successful model since the legendary Escorts of the 1970s. The combination of Cosworth power, four-wheel-drive transmission, and an effective aerodynamic package made it a Rally Giant in all conditions, and, until the all-new Focus WRC was launched in 1999, this generation of Escorts was the most effective rally car that Ford had ever produced.

The inside story of how Rallye Sport Fords were created by Ford in the 70s and 80s, enabling works' and private teams to be fully competitive in national and international rallies and races, to win many championships, and for RS cars to be bought by over 100,000 enthusiast customers! with around 200 photos and illustrations, many previously unpublished, this formerly untold story is brought vividly to life.

Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's 4-cylinder engine. Whether the reader wants a fast road car or to go racing, Des Hammill explains, without using technical jargon, how to build a reliable high-power engine using as many FoMoCo parts as possible and without wasting money on parts and modifications that don't work. Although the text of this book specifically relates to engines with carburetors, many of the modifications described are appropriate to turbocharged/supercharged engines and engines with fuel injection.

This text gives practical advice on how to power tune a high-performance version of Ford's 4-cylinder 1600, 1800 and 200 cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina, Sierra) over many years. Whether the reader wants a fast road car or to go racing, Des Hammill explains, without using technical jargon, how to build a reliable high power engine using as many stock

parts as possible and without wasting money on parts and modifications that don't work. The text also covers Cosworth versions of Pinto engines and fitting Cosworth heads to normal blocks. It does not cover 1300, E-Max 1600 or American built 2300.
