This text introduces all the basic concepts of mechanics - from measurement accuracy, through the concepts of moments and equilibrium, gravity and friction to the application of

momentum and impulse.

Based on over 30 years of successful teaching experience in this course, Robert Pagano's introductory text takes an intuitive, concepts-based approach to descriptive and inferential statistics. He uses the sign test to introduce inferential statistics, empirically derived sampling distributions, many visual aids, and lots of interesting examples to promote student understanding. One of the hallmarks of this text is the positive feedback from students -- even students who are not mathematically inclined praise the text for its clarity, detailed presentation, and use of humor to help make concepts accessible and memorable. Thorough explanations precede the introduction of every formula, and the exercises that immediately follow include a step-by-step model that lets students compare their work against fully solved examples. This combination makes the text perfect for students taking their first statistics course in psychology or other social and behavioral sciences. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"The 1,165 entries of Handbooks and Anthologies for Officials in Imperial China by Pierre-Étienne Will and collaborators provide a descriptive list of extant manuscript and printed works--mainly from the Song, Ming, and Qing dynasties--created with the aim to instruct officials and other administrators of imperial China about the technical and ethical aspects of government, and to provide tools and guides to help with the relevant procedures. Both generalist and specialized texts are considered. Among the latter, such disciplines as the administration of justice, famine relief, and the military receive particular attention. Each entry includes the publishing history of the work considered (including modern editions), an analysis of contents, and a biographical sketch of the author."--
