"The beauty of Lauren Slater's prose is shocking," said Newsday about *Welcome to My Country*, and now, in this powerful and provocative new book, Slater brilliantly explores a mind, a body, and a life under siege. Diagnosed as a child with a strange illness, brought up in a family given to fantasy

and ambition, Lauren Slater developed seizures, auras, neurological disturbances--and an ability to lie. In *Lying: A Metaphorical Memoir*, Slater blends a coming-of-age story with an electrifying exploration of the nature of truth, and of whether it is ever possible to tell--or to know--the facts about a

self, a human being, a life. Lying
chronicles the doctors, the tests, the
seizures, the family embarrassments,
even as it explores a sensitive child's
illness as both metaphor and a means
of attention-getting--a human being's
susceptibility to malady, and to
storytelling as an act of healing and as

In *Lying*, Lauren Slater forces us to redraw the boundary between what we know as fact and what we believe we create as fiction. Here a young woman discovers not only what plagues her but also what heals her--the birth of sensuality, her creativity as an artist--in a book that reaffirms how a

Beyond the Box is the first full-length study of the ways in which Skinner's ideas left the laboratory to become part of the post-war public's everyday lives, and chronicles both the enthusiasm and caution with which this process was

Using selected case studies, Alexandra Rutherford provides a fascinating account of Skinner and his acolytes' attempts to weave their technology of human behavior into the politically turbulent fabric of 1950s-70s American life.
