what is physical property? | Yahoo Answers

What physical properties would you use to separate these mixtures? 1) Iron fillings and salt. 2) Salt and water. Name two physical properties that could be used to distinguish between these substances. 3) Water and rubbing alcohol. 4) Gold and aluminum. 5) Helium gas and oxygen gas. Thank you for your help ^_^

Physical Properties? | Yahoo Answers

physical properties of an element are any you can feel, touch, see. Such as, its state, color, size, density. For example, an ice cube has a solid state. Water has a liquid state, and air has a...

Examples of physical properties? | Yahoo Answers

For the best answers, search on this site <https://shorturl.im/axxc2>. Don't know about the first part. Sorry. For the change, a physical change is when the size or shape changes (but said object is still the same). For example, if a vase drops and breaks, there are pieces of it on the floor, but they are still the same material.

What are the physical/chemical properties ... - Yahoo Answers

Physical properties. Iron is a silvery-white or grayish metal. It is ductile and malleable. Ductile means capable of being drawn into thin wires. Malleable means capable of being hammered into thin sheets. It is one of only three naturally occurring magnetic elements. The other two are nickel and cobalt. Iron has a very high tensile strength.
