Solutions Manual - Process Dynamics and Control | Dale E ...

There are three important process variables in a process control system. (1) Controlled variables (2) Manipulated variables (3) Disturbance variables. Feedback control system measures the controlled variable and compares the measured value with the desired value and then adjusts the manipulated variables for the control of the system accordingly.

Process Dynamics And Control 3rd Edition Textbook ...

Process dynamics and control is a vast subject, profoundly important for maximizing value in plant operations, but unfortunately often neglected by undergraduate students. This book by three of the most illustrious professors of chemical engineering distills their expertise and wisdom, as teachers with about 100 years combined teaching experience, into a highly accessible and cogent textbook.
