This book is a guide designed to make your visa application process easier, save your time and take away the stress you have to go through during the visa process. A lot of travelers around the world face visa denial due to lack of education and information about visas. As an Entrepreneur and an Author, I saw this as a global issue and turned this problem into an opportunity. This book features: introduction to travel visa, Types of visas, visa application process, general documents required for a visa, visa interview questions and answers, non-immigrant and immigrants visas, step by step guide to study abroad, a guide to fill US, UK, Canada, Australia and Schengen visa application forms and lastly, the importance of having a visa and the challenges you might face for traveling without a visa. The last chapter was highlighted in this book to educate migrants who travel through the eastern and mediterranean routes without a visa to Europe and United States.

The idea that you need a travel agent to plan and book your trip belongs in the last century. I've travelled across Europe, solo and on a budget since 2013 and have been living in Germany for close to three years. Somehow, planning for a trip especially the first few has always been a big pain in the a\*\*. Add to that limited budget and time to plan, and you have a big headache. The truth is, that not all of us can afford to spend hundreds of dollars on a custom itinerary from a travel agent nor do we have hundreds of hours to spend on researching across thousands of blogs, booking platforms and travel magazines. I've compiled everything I know about planning, preparing and booking a Europe trip in a practical, precise manner in this book, to help you save a shit ton of time and money when doing the same. To avoid the mistakes I did on my first couple of trips. Planning your dream trip doesn't need to be expensive or time-

Focusing in particular on the European borders, this volume brings together an interdisciplinary group of academics to consider questions of immigration and the free movement of people, linking control within the state to the role of the police and internal security. The contributors all take as the point of departure the significance of European governmentality within the Foucauldian meaning as opposed to the European governance perspective which is already well represented in the literature. They discuss the relation between control of borders, introduction of biometrics and freedom. The book makes available in English an analysis of an important and politically highly charged field from a major French critical perspective. It draws on different disciplines including law, politics, international relations and philosophy.

Every year more than 270,000 students from all around the world come to study in the UK - and the number is growing by 10 per cent a year. At present, most students coming to the UK have to rely on information from their friends, and brief leaflets and booklets supplied by universities. This indispensable guide tells students all they need to know about Britain's higher education system: the application process, funding, immigration controls, health service, accommodation, study methods and employment opportunities, as well as university life, British customs and habits, and lots of other information on day to day living in the UK.

Examining how migrants appropriate mobility in the context of biometric border controls, this volume mobilises new analytics and empirics in the debates about the politics of migration and provides an analytically effective and politically significant tool for the study of contemporary migration. Drawing from the tension between the EU's attempt to achieve watertight border controls by means of biometric technologies, and migrants' persistence to move to and live in the EU, the volume pursues two interrelated objectives: first, it studies the encounters between migrants and the Visa Information System (VIS), one of the largest biometric databases in the world, from the perspective of mobility in order to investigate how migrants appropriate mobility via Schengen visa within and against this biometric border regime. Second, it addresses criticisms of autonomy of migration in order to develop it as a viable approach for border, migration and critical security studies. Hence, the book is driven by two interrelated research questions: what does the assertion of moments of autonomy of migration refer to in the context of border regimes that use biometrics to turn migrants' bodies into a means of mobility control? And
